

IR Report Card — Reader's Guide

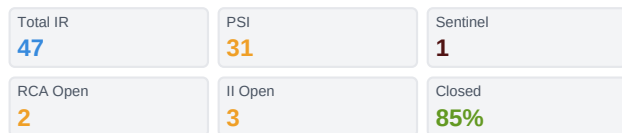

Hospital Al-Sultan Abdullah UiTM · RMCQ-HASA Portal · Clinical Risk Unit

How to interpret each section of the Department Incident Report Card

EMD — Incident Report Card

Hospital Al-Sultan Abdullah UiTM · April 2026

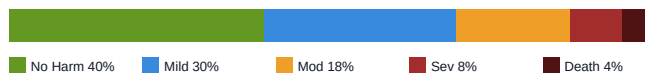

Section 1 — Department KPIs

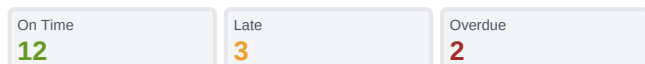

Section 2 — Monthly Trend (PSI per Month)

Section 5 — Severity of Outcome (Real)

Section 6 — II & RCA Status

What you're looking at

The numbered markers on the left match the entries below.

1 Department KPI Tiles

Total IR is every incident reported by the department this month.

PSI = Patient Safety Indicator (the subset MoH/JCI track for benchmarking).

Sentinel = highest-severity events flagged for board review.

RCA / II Open = investigations in progress. Closed % = case-closure rate.

1

2 Monthly Trend (PSI)

X-axis = submission month (date the case was reported, not when it occurred).

A spike often reflects better reporting culture, not necessarily more incidents.

Cross-check with severity before concluding things are getting worse.

2

3 Severity of Outcome (Real)

Real severity = what actually happened to the patient.

Potential severity (separate panel) = what could have happened — drives near-miss learning.

Color: dark red Death · red Severe · amber Moderate · blue Mild · green No Harm.

3

3 4 II & RCA Status

On Time = closed before due date · Late = closed after due date · Overdue = still open past due date.

Overdue is the most actionable lever — chase the case owner to close. Internal Investigation (II) and Root Cause Analysis (RCA) appear in side-by-side panels.

- Page 9 — Internal Investigation cases (detail)
- Page 10 — Root Cause Analysis cases (detail)

How to act on the report

- Sentinel > 0 → escalate to clinical risk committee within 24 h; an RCA is mandatory.
- Severity (Real) cluster of red/dark-red in one ward → site visit and immediate review of practice.
- RCA / II Overdue → chase the action owner; the case stays open in the dashboard until closure date is filled.
- Submission spike with stable severity = healthy reporting culture, not a deterioration. Praise, don't punish.
