What you're looking at

The numbered markers on the left match the entries below.

1 Department Summary

Six headline tiles. Total KPIs is the count of active KPIs the department owns this year.
Compliance answers 'did they submit on time?' (denominator = scheduled periods whose deadline has passed).
Achievement answers 'did they hit target?' (out of submitted reports, what % met the operator/value).
Pending = overdue submissions today. Live SIQ = system-flagged consecutive misses. Open SIQ = manually-logged active investigations.

2 Period Compliance

The same compliance metric, scoped to the period the report covers (e.g. Q1, FY).
The green bar visualises submitted-on-time over scheduled-and-due.

3 KPI Performance Detail

One row per active KPI, paginated 22 per page.
Tgt = target operator and value. Ach / N/A = count of submissions meeting/missing target this period.

4 Compliance % column

Green >= 80%, Amber 50-79%, Red < 50%.
A dash means nothing was scheduled-and-due yet (e.g. yearly KPI early in the year).

5 SIQ flag

! appears when N consecutive misses fire the auto-trigger.
That KPI is now mandatory follow-through:
open or update a Sentinel Investigation Query and document an action plan.

Color & Symbol Reference

Threshold colors (compliance & achievement)

Green	>= 80%	- Healthy
Amber	50-79%	- Watch
Red	< 50%	- Action required

Symbols

- ! SIQ trigger fired - investigation required.
- No data yet (e.g. yearly KPI early in the year).

How to act on the report

- * Red Compliance -> submission discipline issue; chase the submitter, escalate after 7 days.
- * Red Achievement -> performance issue; open or update the SIQ, document corrective action plan.
- * ! flag in SIQ column -> mandatory; the KPI must have a documented investigation, owner, and due date.
- * Live SIQ != Open SIQ - a Live count higher than Open means triggers fired but no investigation was logged.
